

DECENT
SINT PRODUCTS

Manufacturer of Sintered Parts

“To assure quality manufacturing product for utmost satisfaction of the customers in terms of timely supply. To develop the product with latest improvement as per customers requirement.”

DECENT
SINT PRODUCTS

Company Profile

Established in the year 2010 at Kuvadwa GIDC, Rajkot (Gujarat, India), we "Decent Sint Products" are actively engaged in manufacturing and supplying of Sintered products like Sintered Bushing, Sintered Automobile parts, Textile parts, Oil Engine Parts, Submersible Pump bushes etc.

These products are manufactured using Powder metallurgy process keeping in mind the needs and requirements of our customers.

Our professionals quality test these products on various parameters so as to ensure that we offer defect-free products to our customers.

We also Design and manufacture the sintered components as per the specification requirement

Our Infrastructure

We have a large infrastructural unit which is well-equipped with all the fully advanced and latest technology machines upgraded time to time so as to carry out the manufacturing process flawlessly.

Our infrastructural unit is installed with the following machines :

- 10 ton Press
- 20 ton Press
- 40 ton Press
- 60 ton Press
- 100 ton Press
- Electric pusher type muffle furnace
- Vibrating machine
- Powder mixer
- Oil impregnation machine

Powder Metallurgy Process

- Power production
- Sintering
- Blending or mixing
- Finishing operations
- Powder compaction

Segment of the industries Served by us

- Substitute of conventional metals
- Automobile industry
- Water and oil pump industry
- Diesel engine industry
- Mixer and grinder industry
- Submersible pumps
- Fan industry
- Textile industry
- Gear industry

DECENT
SINT PRODUCTS

We have capability to manufacture the sintered components in the following compositions:

IRON

DILUTED BRONZE

BRONZE

BRASS

IRON-COPPER

SINT PRODUCTS

Advantages Of Sintered Parts

- Sintered parts can be mass produced
- Saves time and cost
- Lower variations and scrap rate , reduces weight
- About 97% of the starting powders are converted to products
- Specific level of porosity as required
- Possible to impart required properties
- Wide property control is possible

Our Core Compete

We have an industrial experience and have always maintain quality standards in our product line. Our ultimate goal is client satisfaction. We believe in quality products as well as quality business relations.

We have been able to edge our credibility amongst our competitors due to the following reasons:

- Development of sintered parts as per the given design & specification
- Complete quality control and assurance
- Highly qualified and trained manpower
- Customization as per the requirement
- Cost effectiveness
- On time delivery

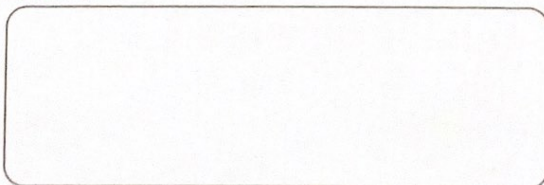

Our Team

Our organization endorses a team highly skilled and knowledgeable experts who work hard and ensure that all the products that we offer to our clients are qualitative. These professionals manufacture the products keeping in mind the needs and requirements of our clients.

We have the following people in our team:

- Engineers
- Sales & marketing personnel
- Technicians
- Skilled & trained workforce
- Quality controllers
